The Economic Challenge for Governors in 2012

Achieving Fiscal Stability

Enhancing State Competitiveness
What is Competitiveness?

• Competitiveness is the **productivity** with which a state utilizes its human, capital, and natural endowments to create value.

• Productivity determines **wages, jobs, and the standard of living**.

• It is not **what** fields a state competes in that determines its prosperity, but **how productively** it competes.
Where Does Productivity Come From?

Businesses and government play different but interrelated roles in creating a productive economy

• Only businesses can create jobs and wealth
• States compete to offer the most productive environment for business
Agenda

1. How is your state doing?  
   State Performance Scorecard

2. Why?  
   Explaining your state’s performance, strengths, and weaknesses

3. Where to go from here?  
   Action Steps

2012 State Competitiveness – Rich Bryden
Comparative State Prosperity Performance
2000 - 2010

Source: BEA. Notes: GDP in real 2005 dollars. Growth rate is calculated as compound annual growth rate.
Comparative State Labor Mobilization Performance
1999-2010

High but declining versus U.S.

High Labor Force Participation and Participation rising versus U.S.

U.S. Labor Force Participation Rate: 64.7%

Low and declining versus U.S.

Change in Labor Force Participation Rate: -2.4%

Low but rising versus U.S.

Notes: Source BLS.
Comparative State Labor Force Productivity Performance
2000-2010

Sources: BEA, BLS. Notes: GDP in real 2005 dollars. Growth rate is calculated as compound annual growth rate.
Comparative State Employee Productivity Performance
2000-2010

High but declining versus U.S.

Low and declining versus U.S.

U.S. GDP per Employed Worker
Real Growth: 1.42%

Highly productive and productivity rising versus U.S.

U.S. GDP per Employed Worker: $94,315

Low but rising versus U.S.

Sources: BEA, BLS. Notes: GDP in real 2005 dollars. Growth rate is calculated as compound annual growth rate.
Comparative State Innovation Performance
2000 - 2010

High and declining innovation

U.S. average Growth Rate of Patenting: +2.25%

High and improving innovation rate versus U.S.

Low and declining innovation

Low and improving innovation

Why?
What Drives State Productivity?

1. Quality of the Overall Business Environment
2. Cluster Development
3. Policy Coordination among Multiple Levels of Geography/Government
Why?
What Drives State Productivity?

1. Quality of the Overall Business Environment
2. Cluster Development
3. Policy Coordination among Multiple Levels of Geography/Government
Quality of the Overall Business Environment

Context for Firm Strategy and Rivalry

Rules and incentives that encourage local competition, investment and productivity
- e.g., tax policy that encourages investment and R&D
- Flexible labor policies
- Intellectual property protection
- Antitrust enforcement

Factor (Input) Conditions

Access to high quality business inputs
- Human resources
- Capital access
- Physical infrastructure
- Administrative processes (e.g., permitting, regulatory efficiency)
- Scientific and technological infrastructure

Demand Conditions

Sophisticated and demanding local needs and customers
- e.g., Strict quality, safety, and environmental standards
- Consumer protection laws
- Government procurement of advanced technology
- Early demand for products and services

Related and Supporting Industries

Local availability of suppliers and supporting industries

• Many things matter for competitiveness
• Economic development is the process of improving the business environment to enable companies to compete in increasingly sophisticated ways
Improving the Business Environment
Common Action Items

1. Simplify and speed up regulation and permitting

2. Reduce unnecessary costs of doing business

3. Establish training programs that are aligned with the needs of the state’s businesses

4. Focus infrastructure investments on the most leveraged areas for productivity and economic growth

5. Design all policies to support emerging growth companies

6. Protect and enhance the state’s higher education and research institutions

7. Relentlessly improve the public education system, the essential foundation for productivity in the long run
Why?
What Drives State Productivity?

1. Quality of the Overall Business Environment

2. Cluster Development

3. Policy Coordination among Multiple Levels of Geography/Government
What is a Cluster?

A geographically concentrated group of interconnected companies and associated institutions in a particular field

**Traded Clusters**
- Compete to serve national and international markets
- Can locate anywhere
- 30% of employment

**Local Clusters**
- Serve almost exclusively the local market
- Not directly exposed to cross-regional competition
- 70% of employment
Example: Massachusetts Life Sciences Cluster

- Health and Beauty Products
- Surgical Instruments and Suppliers
- Medical Equipment
- Dental Instruments and Suppliers
- Ophthalmic Goods
- Diagnostic Substances
- Containers

Teaching and Specialized Hospitals

- Biological Products

Biopharmaceutical Products

Cluster Organizations
- MassMedic, MassBio, others

- Specialized Business Services
- Banking, Accounting, Legal

- Specialized Risk Capital
- VC Firms, Angel Networks

- Specialized Research Service Providers
- Laboratory, Clinical Testing

Research Organizations

Educational Institutions
- Harvard, MIT, Tufts,
  Boston University, UMass
Example: Houston Oil and Gas Cluster

**Upstream**

- Oil & Natural Gas Exploration & Development
- Oil & Natural Gas Completion & Production

**Downstream**

- Oil Transportation
- Oil Trading
- Oil Refining
- Oil Distribution
- Oil Wholesale Marketing
- Oil Retail Marketing
- Gas Gathering
- Gas Processing
- Gas Trading
- Gas Transmission
- Gas Distribution
- Gas Marketing

**Oilfield Services/Engineering & Contracting Firms**

- Equipment Suppliers
  - (e.g., Oil Field Chemicals, Drilling Rigs, Drill Tools)
- Specialized Technology Services
  - (e.g., Drilling Consultants, Reservoir Services, Laboratory Analysis)
- Subcontractors
  - (e.g., Surveying, Mud Logging, Maintenance Services)
- Business Services
  - (e.g., MIS Services, Technology Licenses, Risk Management)

**Specialized Institutions**

- (e.g., Academic Institutions, Training Centers, Industry Associations)
Strong Clusters Drive Regional Performance

- Specialization in **strong clusters**
- **Breadth** of industries within each cluster
- Strength in **related clusters**
- Presence of a region’s clusters in **neighboring regions**

- **Job** growth
- Higher **wages**
- Higher **patenting** rates
- Greater **new business** formation, growth and survival

On average, cluster strength is much more important (78.1%) than cluster mix (21.9%) in driving regional performance in the U.S.

Clusters and Economic Diversification

Note: Clusters with overlapping borders or identical shading have at least 20% overlap (by number of industries) in both directions.

</table>

On average, cluster strength is much more important (78.1%) than cluster mix (21.9%) in driving regional performance in the U.S.

LQ, or Location Quotient, measures the state’s share in cluster employment relative to its overall share of U.S. employment. An LQ > 1 indicates an above average employment share in a cluster.

**Leading Clusters**<br>by employment size, 2009 (national rank)
- Oil and Gas Products and Services (3)
- Heavy Construction Services (18)
- Entertainment (13)
- Motor Driven Products (9)
- Production Technology (16)
Cluster Development
Common Action Items

1. Build on the state’s **existing and emerging clusters** rather than chase “hot” fields

2. Pursue economic diversification **within clusters** and **across related clusters**

3. Create a private sector-led **cluster upgrading program** with matching support for participating private sector cluster organizations
   - Government should **listen** and **remove obstacles** to cluster improvement

4. **Align** other state economic policies and programs with clusters

Clusters provide a framework for organizing the implementation of many public policies and public investments to achieve greater effectiveness.
Why?
What Drives State Productivity?

1. Quality of the Overall Business Environment
2. Cluster Development
3. Policy Coordination among Multiple Levels of Geography/Government
Geographic and Governmental Influences on Productivity

- Nation
- Neighboring State
- State
- Metropolitan Areas
- Rural Regions
- Neighboring State
Defining the Appropriate Economic Regions

The economies of states are often an aggregation of distinct economic areas with differing circumstances.

Wage Performance in Oklahoma Metropolitan Areas

U.S. Average Private Wage: $42,403

Oklahoma Average Private Wage: $35,061

Average Private Wage, 2009

Tulsa MSA

Oklahoma City MSA

Rest of State

Lawton MSA

Fort Smith MSA*

U.S. Growth Rate of Wages: 3.01%

Oklahoma Growth Rate of Wages: 3.29%

Growth Rate of Private Wages, 1998-2009

2.8% 3.0% 3.2% 3.4% 3.6% 3.8%

*Oklahoma portion only
Source: Census CBP, authors' analysis. Note: “Bubble” size in chart is proportional to employment in 2009.
Employment Performance in Oklahoma Metropolitan Areas

Growth Rate of Private Employment, 1998-2009

- **U.S. Growth Rate of Employment**: 0.52%
- **Oklahoma Growth Rate of Employment**: 0.91%
- **Fort Smith MSA**: 1.5%
- **Lawton MSA**: 0.3%
- **Rest of State**: 0.6%
- **Tulsa MSA**: 0.9%
- **Oklahoma City MSA**: 1.2%
- **U.S. Average Private Wage**: $42,403
- **Oklahoma Average Private Wage**: $35,061

Source: Census CBP, authors' analysis. Note: “Bubble” size in chart is proportional to employment in 2009.

*Oklahoma portion only
Geographic and Governmental Influences on Productivity

1. **Influence** and **access** federal policies and programs

4. **Integrate** policies and infrastructure planning with neighbors

2. Work with each metro area to develop a **prioritized strategic agenda**

3. **Connect** rural regions with proximate urban areas
Agenda

1. How is your state doing?  State Performance Scorecard

2. Why?  Explaining your state’s performance, strengths, and weaknesses

3. Where to go from here?  Action Steps
Agenda

1. How is your state doing?  
   - State Performance Scorecard

2. Why?  
   - Explaining your state’s performance, strengths, and weaknesses

3. Where to go from here?  
   - Action Steps

Biggest Action Item of All
Create an Economic Strategy

- What is the **distinctive competitive position** of the state or region given its location, legacy, existing strengths, and potential strengths?
  - What unique value as a business location?
  - For what types of activities and clusters?

- **Define the Value Proposition**

- **Develop Unique Strengths**
  - What **elements of the business environment** can be unique strengths relative to peers/neighbors?
  - What **existing and emerging clusters** represent local strengths?

- **Achieve and Maintain Parity with Peers**
  - What **weaknesses** must be addressed to remove key constraints and achieve parity with peer locations?

- Economic strategy requires **setting priorities** and **moving beyond** long lists of separate recommendations.
How Should States Compete for Investment?

**Tactical (Zero Sum Competition)**
- Focus on attracting **new** investments
- Compete for **every** plant
- Offer **generalized** tax breaks
- Provide **subsidies** to lower / offset business costs
- Every city and sub-region **for itself**
- **Government** drives investment attraction

**Strategic (Positive Sum Competition)**
- Also support greater local investment by **existing** companies
- Reinforce areas of **specialization** and emerging cluster strength
- Provide state support for training, infrastructure, and institutions with **enduring benefits**
- Improve the **efficiency of doing business**
- Harness efficiencies and coordination **across jurisdictions**, especially with neighbors
- **Government and the private sector collaborate** to build cluster strength
Harnessing the New Process of Economic Development

Competitiveness is the result of both top-down and bottom-up processes in which many companies and institutions take responsibility.

**Old Model**
- **Government** drives economic development through policy decisions and incentives

**New Model**
- Economic development is a collaborative process involving government at multiple levels, companies, teaching and research institutions, and private sector organizations
Example: Organizing for Economic Development

South Carolina Council on Competitiveness

- Chaired by a business leader and reporting to the governor
- Convenes working groups, provides direction and strength, holds working groups accountable

Executive Committee

Coordinating Staff

Cluster Committees

- Automotive
- Hydrogen / Fuel Cells
- Textiles
- Apparel
- Agriculture
- Travel and Tourism

Task Forces

- Cluster Activation
- Research / Investment
- Distressed / Disadvan. Areas
- Education / Workforce
- Start-ups / Local Firms
- Measuring Progress

Effective economic policy also requires coordination within government
Summary

• The goal of economic strategy is to enhance **productivity**. This is the only way to create jobs, high income, and wealth in the long run

• Improving **productivity** and **innovation** must be the guiding principles for every state policy choice

• Improving productivity does not require new public resources, but **using existing resources better**

• Improving productivity demands that governors **mobilize the private sector**, not rely on government alone

• Economic strategy is non-partisan and about getting **results**
Next Steps

1. Reach out to your team

2. Reach out to the business community

The prosperity of the U.S. economy will depend more on the success of states in improving competitiveness than what happens in Washington
